**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5, 7-10 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Bois (#6,085,491). Bois shows the method and apparatus for sealing a reclosable fastener in a crossweb technique on a substrate by attaching the fastener 70 to substrate 42 with a pair of sealing jaws 82 which are longer than the body of the fastener as shown in figure 9. The fastener is in between two webs as shown in figure 9. The surface of the strip that is sealed to the sides of the bag reads on a flange as claimed. Bois disclose the strips can be complementary shapes, such as male and female components (col 7 lines 50+). Bois show severing means (94) to provide for severing the bags.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bois.

Bois disclose complementary male and female components as discussed supra but do

not specifically show the structure of the male and female components. The examiner notes that it is well known in the art to use complementary male and female components as claimed.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
